

Lecture for Clinical Genomics Course

Weill Cornell Medical College

April 16, 2013

Gholson Lyon

Questions:

- 1) What is the difference between precision and accuracy?
- 2) How does this apply in the case of exome and whole genome sequencing?
- 3) On a related note, please explain what you learned regarding false negatives and false positives, and how this relates to sensitivity and specificity for any clinical test?
